SHELF STABLE CHEESE

It is made by blending natural cheese with premium ingredients and cooking it to pasteurization. It has all the flavour of natural cheese with the added benefit of an extended shelf life of one year.

Processed Cheese vs. Natural Cheese

While natural cheese is appetizing, Processed Cheese is equally enticing but has a longer shelf life and added functional qualities. Processed cheese can be produced to have the added value of shelf stability that makes it great for gift baskets!

Benefits of Processed and Shelf Stable Cheese

- Shelf stable properties of processed cheese make it a great gift idea.
- Processed cheese has a longer shelf life than natural cheese.

$1.75

LADDERED BOXES

Designed By Saksco

A Cost-Effective & Smart Choice!

We have designed these boxes with the intent of increasing the perceived value of your gifts while also reducing the effort involved in assembling them.

Save on Filler:

No filler material required as riser is included in the box.

Improved Appearance:

The colour of the riser is matched to the colour of the box thus making it more appealing than a regular basket.

Better Perceived Value:

The glossy, laddered base adds extra height and a fuller appearance to your gift thus giving it a higher value-for-money perception.

Save Time & Effort:

You will be able to assemble your basket in no time with minimal effort by using the Laddered box. This box eliminates/reduces the need for assembling material like tape or glue dots.

Easy To Make:

Even an inexperienced person can assemble a gift basket in seconds using these boxes. Time is money during the Christmas season, and these boxes will save you both.

Save Space:

The boxes come flat/unassembled which makes handling convenient.

STOCK AVAILABILITY

All products offered by SAKSCO Gourmet Basket Supplies are designated as either Year-Round or Limited Availability. The availability status of each item is indicated within the product pricing section of this catalogue.

Year-Round: Year-Round products are generally shelf stable items that can be replenished within a reasonable time-frame. These products are sourced primarily from Canadian and U.S. suppliers and typically carry an extended shelf life. SAKSCO is committed to maintaining inventory of these products throughout the year, subject to normal supply conditions.

Limited: Limited Availability product include seasonal items, specialty imports, and products sourced only once per year, including selected European and Far East imports. Once inventory is depleted, these items may not be available again until the following season or calendar year. This category may also include products with shorter shelf lives or time-sensitive seasonal offerings.

Planning & Ordering Recommendations:

For customer presentations, corporate programs, printed brochures, catalogues, or other long-term promotional materials, we recommend selecting products designated as **Year-Round** whenever possible. Products marked **Limited Availability** are typically available during the Fall and holiday season. To help secure inventory, customers are encouraged to participate in our **Pre-Booking Program**, available **August 17-31 2026**, when orders for seasonal products can be placed in advance.

Following the pre-booking period, Limited Availability products remain available while supplies last. As quantities are limited and many seasonal items cannot be replenished, we strongly recommend ordering as early as possible to ensure the best selection and availability.

Availability is subject to SAKSCO's inventory on hand and supplier delivery schedules.

What Is The Right Size Of Bag You Need?

For all baskets in our catalogue, refer to page 86 for recommended bags & base information beside each basket code. For other baskets, you can calculate the appropriate size as follows: measure the largest circumference, divide it by 2 and choose a bag that is larger than this number. For example, if the largest circumference is 48" then you should select 25" width bag (48 divided by 2 equals 24 and size bigger than 24 will be 25" bag).
